2.Python program to convert degree centigrade to fahrenheit

```python
celsius = float(input("Enter the degree centigrade: "))
# calculate fahrenheit
fahrenheit = (celsius * 1.8) + 32
print('%0.1f degree Celsius is equal to %0.1f degree Fahrenheit' %(celsius,fahrenheit))
```

Output:

Enter the degree centigrade:

31.2

31.2 degree Celsius is equal to 88.2 degree Fahrenheit
